PROFILE

Innovative Front-End Developer with expertise in HTML5, CSS3, JavaScript, and React. Currently advancing Full Stack skills through an intensive boot camp. Experienced in Agile methodologies and frameworks, adept at working effectively in cross-functional teams. Utilizes 4 years of leadership experience to foster collaboration and drive exceptional user experiences. Passionate about creating responsive, user-focused designs and committed to continuous learning and growth.

PROJECTS

E-commerce Store | Developer | August 2024

Designed and implemented a responsive e-commerce store using React, featuring dynamic product listings, an intuitive "add to cart" functionality, and a search filter for easy discovery. The mobile-friendly design and optimized load times ensure a smooth shopping experience across devices.

Movie Application | Developer | May 2024 – July 2024

Built MoviesFlix-Hub, a full-stack movie app using Node.js and React, with seamless RESTful API integration. It features a dynamic interface for browsing, searching, and viewing film details, along with user profile management and a responsive design for an engaging movie discovery experience.

ChimeIn Chat Application | Developer | August 2024

ChimeIn is a real-time chat application built with React and Firebase, offering a seamless messaging experience. It features a clean, responsive interface with user authentication, real-time messaging, profile management, image sharing, and contact management. Utilizing React 18.3, Vite 5.4, and Firebase, ChimeIn ensures fast, secure, and efficient communication for both personal and professional use.

Chat App (React Native) | Developer | July 2024 – September 2024

Developed a React Native chat app with Firebase for real-time data synchronization and user authentication. Users can create accounts, join chat rooms, and send instant messages. The app features a clean, intuitive interface and performs reliably on both iOS and Android, ensuring seamless communication across devices.

Movie Application Api | Developer | April 2024 - May 2024

Developed a Node.js and Express API for managing movie data, including user authentication, movie management, and favorites. Utilized JWT for secure access and MongoDB for data storage, with features for user registration, movie retrieval, and dynamic endpoints. Designed with CORS and Passport for scalable, secure, and efficient backend functionality.

EMPLOYMENT HISTORY

SHIFT SUPERVISOR at CKA Management, Middletown

November 2020 — Present

Leadership and Team Collaboration: Managed and trained a team of 20+, enhancing cohesion and performance. Developed strong leadership and communication skills essential for effective team collaboration on development projects.

Problem-Solving and Technical Compliance: Resolved operational issues and improved

AWS
ESLint
Tailwind
Chome DevTools
Database Management
API Gateway
End To End Testing
Unit Testing
Web Accessibility
Angular

compliance, honing advanced problem-solving skills for debugging and refining web applications. Experienced in troubleshooting and process improvements.

Effective Communication: Enhanced communication between staff and management, increasing order accuracy and customer satisfaction by 15%. Cultivated the ability to relay information clearly and manage high-pressure interactions, ensuring effective communication within development teams.

EDUCATION

Coding Boot Camp, Career Foundry, Berlin, Germany

January 2024 — Present

Comprehensive Full-Stack Development Skills: Gained expertise in both front-end and back-end technologies, including HTML, CSS, JavaScript, React, Node.js, and Express. Through hands-on projects, developed the ability to handle complex and dynamic web applications, enhancing my skills in building responsive and efficient solutions.

Advanced Problem-Solving and Project Management: Successfully tackled complex projects, enhancing my skills in problem-solving, debugging, and agile project management. This experience significantly improved my ability to address real-world development challenges and deliver high-quality solutions.

Enhanced Collaboration and Technical Expertise: Acquired hands-on experience in collaborating with peers, using version control (Git), integrating APIs, and deploying applications. This practical experience sharpened my technical skills and prepared me for effective teamwork and fast-paced development environments.

Health Sciences, William Patterson University, Wayne

September 2017 — May 2020

Health Sciences, American Public University, Charles Town

October 2020 — April 2022

Analytical and Research Skills: Developed robust analytical skills through comprehensive research projects and data analysis during my health science degree. This experience enhances my ability to approach coding problems methodically, break down complex issues, identify patterns, and develop effective solutions.

Attention to Detail: Gained precision through meticulous data collection, documentation, and analysis. This attention to detail translates directly to coding, ensuring accuracy in writing and reviewing code, as well as effective debugging, leading to high-quality and reliable software development.

Problem-Solving and Critical Thinking: Strengthened problem-solving and critical thinking abilities by diagnosing and addressing health-related issues. These skills are crucial in computer science for troubleshooting bugs, optimizing performance, and developing innovative solutions to technical challenges.

Data Management and Interpretation: Acquired a strong foundation in managing and interpreting large datasets, applicable to working with databases, APIs, and data-driven applications. This experience is essential for building functional and efficient software solutions.

Communication and Teamwork: Engaged in significant collaboration with peers and communicated complex information to stakeholders. These skills are crucial for effective teamwork and clear communication within development teams, ensuring successful project outcomes and the delivery of high-quality software.
